...

In this drawing assessment and therapeutic intervention, the patient is asked to draw a road. This is a projective assessment used to create a graphic representation of the person's "road of life." The road drawing has the potential to elicit spontaneous imagery that represents the client's origins, the history of his or her life process, experiences to date, and intent for the future - even from a single drawing (Hanes, 1995, 1997, 2008).
