The Wheels & Brakes business designs, manufactures, tests and supports aircraft wheel and braking systems for more than 200 commercial, civil and military aircraft applications worldwide. Products include electric and hydraulically actuated brakes with steel or carbon friction material, brake control systems, tire pressure monitoring systems and brake temperature monitoring systems.

Aircraft Wheels & Brakes | UTC Aerospace Systems

Aircraft equipped with auto brakes typically bypass the brake control valves or brake metering valves and use a separate auto brake control valve to provide this function. In addition to the redundancy provided, auto brakes rely on the anti-skid system to adjust pressure to the brakes if required due to an impending skid.
