Nursing School Notes - Straight A Nursing

A fistula-in-ano is an abnormal tract or cavity with an external opening in the perianal area that is communicating with the rectum or anal canal by an identifiable internal opening. Most fistulas are thought to arise as a result of cryptoglandular infection with resultant perirectal abscess.

Fistula-in-Ano: Background, Anatomy, Etiology

Lesbian, gay, bisexual, transgender and questioning (LGBTQ) individuals experience higher rates of health disparities. These disparities may be driven, in part, by biases of medical providers encountered in health care settings. Little is known about how medical, nursing, or dental students are trained to identify and reduce the effects of their own biases toward LGBTQ individuals.

Training to reduce LGBTQ-related bias among medical ...

The British Medical Journal recently called evidence-based medicine (EBM) one of the fifteen most important milestones since the journal's inception 1.The concept of EBM was created in the early 1980's as clinical practice became more data-driven and literature based 1, 2.EBM is now an essential part of medical school curriculum 3.For plastic surgeons, the ability to practice EBM is limited.

Identifying and Avoiding Bias in Research

The RN-BC designation refers to a board-certified registered nurse. Administered by the ANCC, nurses can become board-certified in specialties including pediatrics, cardiac and medical-surgical nursing. To earn the credential, you must meet experience and education requirements and pass an exam.

What Is an RN-BC? | Career Trend

Fournier's gangrene (FG) is a fulminant form of infective necrotising fasciitis of the perineal, genital, or perianal regions, which commonly affects men, but can also occur in women and children. 1 Even though this clinical entity is eponymously credited to the Parisian venerologist Jean-Alfred Fournier, who described it as a fulminant gangrene of the penis and scrotum in young men, 2 ...
