Modern Architecture And Other Essays

Vastu shastra (vāstu śāstra - literally "science of architecture") are texts on the traditional Indian system of architecture. These texts describe principles of design, layout, measurements, ground preparation, space arrangement, and spatial geometry. The designs aim to integrate architecture with nature, the relative functions of various parts of the structure, and ancient beliefs ...

Mathematics and architecture are related, since, as with other arts, architects use mathematics for several reasons. Apart from the mathematics needed when engineering buildings, architects use geometry: to define the spatial form of a building; from the Pythagoreans of the sixth century BC onwards, to create forms considered harmonious, and thus to lay out buildings and their surroundings ...

Modernist Architecture in America (c.1925-60) A late feature of modern art in general, Modernist Architecture was the attempt to create new designs for the "modern man". It rejected all traditional styles based on older prototypes, and proposed a new type of functional design which used modern materials and construction techniques, to create a new aesthetic and sense of space.
