The chemistry of carbohydrates most closely resembles that of alcohol, aldehyde, and ketone functional groups. As a result, the modern definition of a CARBOHYDRATE is that the compounds are polyhydroxy aldehydes or ketones. The chemistry of carbohydrates is complicated by the fact that there is a functional group (alcohol) on almost every carbon.

CH103 - Chapter 8: The Major Macromolecules - Chemistry

On the wall hung a row of portraits, representing the forefathers of the Bellingham lineage, some with armour on their breasts, and others with stately ruffs and robes of peace. All were characterized by the sternness and severity which old portraits so invariably put on; as if they were the ghosts ...
