## Module Equations And Relationships

Hrm.  $7 + 7 = 14$ , but we can't show "14:00" on a clock. So it must be 2. We do this reasoning intuitively, and in math terms:  $(7 + 7) \bmod 12 = (14) \bmod 12 = 2 \bmod 12$  [2 is the remainder when 14 is divided by 12] The equation "14 mod 12 = 2 mod 12" means, "14 o'clock" and "2 o'clock" look the same on a 12-hour clock.
