Nutrition across the life stages, Table of contents ...

Ongoing studies are investigating whether the consumption of 30 percent fewer calories (undernutrition, not malnutrition) slows aging and age-related disease and extends life spans in nonhuman primates. There is no evidence that severe energy restriction would extend the human life span beyond its current maximum of 115 to 120 years.

Human nutrition - Nutrition throughout the life cycle ...

No matter your age or place in the life cycle, it is key to try to get as many of the nutrients your body needs through the foods you eat. A renewed emphasis on more plant-based foods such as vegetables, fruit, whole grains, and legumes, with some dairy and lean animal proteins can help to get you closer to this goal.

Nutrition Needs Across Your Lifespan

Think about the life span and make a list of what you would consider the periods of development. How many stages are on your list? Perhaps you have three: childhood, adulthood, and old age. Or maybe four: infancy, childhood, adolescence, and adulthood. Developmentalists break the life span into nine stages as follows: Prenatal Development
