Firewalld is the new concept and default tool to manage the host based Firewall in Centos/RHEL7.0. In earlier version, iptables was used to manage the firewall. The iptables service still exist, but it should not be used to manage the firewall.. Firewalld has several advantages over iptables. Such as iptables uses three separate services for IPv4 (iptables), IPv6 (ip6tables) and software ...

Firewalld Basic concepts Explained with Examples

If you're looking for a study book, then I would recommend the one that I used myself - Sander van Vugt's RHCE guide. He also has a video course, in case you are interested. Michael Jang's book is also referenced quite heavily in various RHCE forums, Reddit etc., you might want to give that a go too.
