Love Story - Wikipedia

The difference between stress and burnout. Burnout may be the result of unrelenting stress, but it isn't the same as too much stress. Stress, by and large, involves too much: too many pressures that demand too much of you physically and mentally. However, stressed people can still imagine that if they can just get everything under control, they'll feel better.

Burnout Prevention and Treatment - HelpGuide.org

The confusion about bonding and the secure attachment bond. The words bond or bonding are commonly used to describe both caretaking and the emotional exchange that forms the attachment process, even though they are very different ways of connecting with your child.. One is a connection based on the care a parent provides for their infant child, while the other is based on the quality of ...
