Tropical Climatology An Introduction To

The climate sensitivity of populations and economic production in the tropics also makes these regions especially vulnerable to any negative impacts arising from human-induced climate change. Tropical Climatology aims to provide a geographical viewpoint on the physical processes in the tropical atmosphere: to offer explanations of how a location's climate is a product of these processes and to highlight the implications of tropical atmospheric behaviour and climate change for those living in ...

Tropical Climatology: An Introduction to the Climates of ...

This book, primarily intended for students of geography and their lecturers, gives a non-mathematical treatment of the subject. In chapter 1, the term "tropics" is defined, the climatic boundaries of the tropics outlined and the importance of the tropics indicated. Chapters 2-8 deal with various components and factors of the tropical climate, viz. radiation, temperature, the general ...

Climatology (from Greek κλίμα, klima, "place, zone"; and -λογία, -logia) or climate science is the scientific study of climate, scientifically defined as weather conditions averaged over a period of time. This modern field of study is regarded as a branch of the atmospheric sciences and a subfield of physical geography, which is one of the Earth sciences.
