Apply ice to your knee initially. While your knee is still in the acute phase (significant inflammation and pain), apply ice to it. The application of ice is an effective treatment for essentially all acute musculoskeletal injuries. Cold therapy should be applied to the area around the incision in order to reduce the swelling and pain, particularly in the muscles.

Return to the Top 400 Home Page Sales Performance: Personal Services Franchises . By Laura Michaels. Finding some positive news in the midst of the otherwise dreadful sales performance of the personal services category took some digging, but it seems one segment was made to serve the millions of people stuck at home last year: junk haulers.
