four, four-stroke. A 76.2mm bore x 76.2mm stroke result in a displacement of just 1188.0 cubic centimeters.

Yamaha FJ1200: review, history, specs - CycleChaos

Yamaha moved fast to improve the original FJ, enlarging its 1097cc air-cooled, 16-valve four-cylinder engine to 1188cc to produce the FJ1200. At the same time some details were refined while the basic layout was retained. If the FJ's engine owed much to previous Yamahas, its chassis was much more innovative.

Engine. The FJ1200 uses a four cylinder in-line layout and is air cooled. Sixteen valves are operated by a chain driven double overhead camshaft, valve clearances are adjusted using shims. The four constant velocity carburetors are mounted in a bank behind the cylinders and feed each cylinder through short intake manifolds. Four exhaust downpipes join a box below the engine where the gases are split to exit through two silencers.
